

The purpose of this document

This mini brand guideline summarizes the correct, consistent use of the neuwerk brand's logo and core visual elements. Its goal is to ensure the logo, color palette, and typography appear consistently and recognizably across every surface — both print and digital.

This document is an informational base kit; it can be expanded into a full brand guideline (brand elements, iconography, photo style, templates) as the brand grows.

01	01 The logo and its variations — page 3	page 3
02	02 Clear space & minimum size — page 4	page 4
03	03 Prohibited uses — page 5	page 5
04	04 Color palette — page 6	page 6
05	05 Typography — page 7	page 7

Primary logo and its variations

The primary version appears on a dark (navy) background, with a white logotype and orange icon — this should be favored on every surface wherever possible. The other variants should be used only when the background color doesn't allow for it. Every variant comes from the same original logo file — none are redrawn.

PRIMARY on dark bg

PRIMARY on light bg

monochromatic

Primary versions are on dark and on light background
Monochrome version - only when the surface doesn't allow color use
(e.g. engraving, single-color print, watermark).

Clear space & minimum size

Always leave a clear area around the logo, free of other graphic elements, text, or the edge of the page. The unit (x) equals the height of the icon — never use a smaller distance in any layout.

The dashed frame marks the minimum protected clear-space boundary (= 1x, i.e. the icon's height on every side).

Minimum size — Digital: 24 px

Minimum size — Print: 15 mm

MINIMUM SIZE - DIGITAL

24px

MINIMUM SIZE - PRINT

15mm

Below these sizes, the legibility of the logotype and the icon's details are compromised — in such cases, if space is very limited, only the icon may be used (in a mark/favicon role).

Prohibited uses

To maintain a consistent appearance of the logo, the following distortions and modifications are not permitted on any surface.

- Don't stretch / distort the proportions
- Don't rotate the logo
- Don't apply foreign colors
- Don't add a shadow, outline, or effect
- Don't place it on a busy / low-contrast background
- Don't change the spacing between the icon and the text

04 - COLORS

Color palette

PRIMARY COLORS

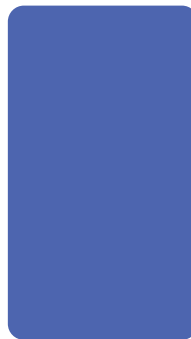

Navy Blue

CMYK 100 96 29 39
RGB 27 30 82
HEX 1b1e52
pantone 2766 C

Blue tint 1

CMYK 100 94 0 0
RGB 39 57 147
HEX 273993

Blue tint 2

CMYK 77 64 0 0
RGB 78 102 175
HEX 4e66af

Blue tint 3

CMYK 48 37 0 0
RGB 136 149 203
HEX 8895cb

Blue tint 4

CMYK 29 15 0 0
RGB 175 198 231
HEX afc6e7

White

CMYK 60 40 40 100
RGB 100 100 100
HEX 000000

Navy Blue is the primary color of the identity and should dominate large surfaces — backgrounds, large blocks, and the main compositional elements of any layout. White carries equal weight as a foundation color: large-format surfaces can be built on white just as confidently as on Navy Blue, and the two should be treated as interchangeable "canvas" options depending on the context and mood of the piece. To add depth, contrast, and flexibility within Navy Blue-led surfaces, the four supporting blue tints may be used as tonal variations — for gradients, layering, secondary shapes, or to create visual hierarchy without introducing an unrelated color.

ACCENT COLOR

Sun

CMYK 0 40 100 0
RGB 255 165 0
HEX ffa500
Pantone 137 C

Sun is the identity's accent color, used to bring energy and focus to a composition. Because of its visual intensity, Sun must never dominate — it should cover no more than 10–15% of the total visible surface in any single graphic or layout, reserved for highlights, calls to action, key details, or focal points that need to stand out against the Navy Blue and white foundation.

Color palette

SECONDARY COLORS

Mint

CMYK 75 0 61 0 CMYK 87 33 79 23 CMYK 38 0 27 0
RGB 30 183 139 RGB 21 110 78 RGB 157 214 191

Melon

CMYK 0 37 35 0 CMYK 0 68 67 0 CMYK 2 21 16 0
RGB 249 176 154 RGB 243 117 88 RGB 246 207 198
HEX f9b09a HEX f37558 HEX f6cfc6

Levander

CMYK 4 28 0 0 CMYK 16 54 4 0 CMYK 0 13 0 0
RGB 238 193 219 RGB 209 138 181 RGB 252 227 238
HEX eec1db HEX d18ab5 HEX fce3ee

Azure

CMYK 64 0 22 0 CMYK 86 38 50 14 CMYK 28 0 9 0
RGB 72 195 203 RGB 29 115 117 RGB 181 226 231
HEX 48c3cb HEX 1d7375 HEX b5e2e7

The secondary palette — Mint, Azure, Melon, and Levander — pairs well with Navy Blue and offers more flexibility than Sun, but should stay reserved for complex, content-rich applications such as infographics, diagrams, illustrations, and presentation materials, rather than core brand surfaces like large backgrounds or simple layouts. Within a single graphic, the four families can be freely combined and layered — for example to distinguish categories in a chart or add variety to an illustration — without a fixed percentage limit; their use is governed by context rather than quantity.

Typefaces

The character of the logotype — rounded, geometric, low-contrast stroke — is visually closest to the Poppins typeface family, so it's recommended as the primary brand typeface (headlines, UI, emphasis). As a complementary, secondary typeface, adding Lora (a serif) is recommended — it's freely usable and provides good contrast for longer, editorial-style text.

Until the brand guidelines are finalized, and as a complementary typeface for email correspondence and Office applications, we recommend using Arial and its Bold, Light, and Italic styles.

PRIMARY - POPPINS

Aa

headlines, UI, emphasis, buttons

Regular	BODY TEXT
Medium	EMPHASYS
SemiBold	SUBHEADLINE
Bold	HEADLINE

SECONDARY - LORA

Aa

longer text, quotes, editorial content

Regular	BODY TEXT
<i>Italic</i>	QUOTE
Medium	EMPHASYS
SemiBold	SUBHEADING

APPLICATION EXAMPLE

Poppins SemiBold — subheading for website or presentation

Lora Regular — this is a sample of a longer, editorial-style paragraph, usable for blog posts, case studies, or newsletter copy, providing a pleasant reading experience alongside Poppins' geometric headlines.
